17. ABSTRACT (MAX. 250 WORDS)

This report marks the 18th consecutive year in the present series of reports of the Office of Education on early fall enrollment in institutions of higher education. It continues to report separate counts of students taking work creditable toward bachelor's or higher degrees. The 1963 survey was expanded to include a separate count of undergraduate students in programs not chiefly creditable toward a bachelor's or higher degree.

Complete listings of the fall enrollment reports of the individual institutions form the major portion of the circular; summary tables show national totals for each survey item, by control and type of institution and sex of students, and State totals for the basic enrollment categories.

FOREWORD

The fall of 1963 marks the eighteenth consecutive year in the present series of reports on early fall enrollment in institutions of higher education. The survey has been expanded this year to include a separate count of undergraduate students in programs not chiefly creditable toward a bachelor's degree. Continued in the survey are the separate counts of students taking work creditable toward bachelor's or higher degrees; these counts of total and first-time students taking such work have been reported since the inception of the survey in 1946.

Presented in this circular for fall 1963 are summary tables which show national totals for each survey item, by control and type of institution and sex of students, and State totals for the basic enrollment categories. Complete listings of the full enrollment reports of the individual institutions form the major portion of this circular. In previous years the institutional reports were shown in a single alphabetical list, but this year two such lists are presented in order to accommodate all the data from the expanded report-form.

The survey was planned and conducted by Dr. Edith M. Huddleston under the general direction of Dr. Kenneth G. Nelson, chief of the Higher Education Surveys Section. Mrs. Hazel C. Poole supervised the verification of returns and the preparation of tables under the general direction of Mrs. Mabel C. Rice, head of the Review and Analysis Unit. Computer programing and machine tabulations were directed by Mr. Harry K. Lester.

The Opening Fall Enrollment survey serves the need for a quick count of enrollment at the beginning of the fall semester or quarter. It is hoped that the increased coverage of enrollment will make the data more useful by reflecting more adequately the student loads which the colleges and universities are carrying. The Office of Education extends its deepest thanks to the registrars whose efforts have made possible the publication of more complete data this year without any delay in the time schedule.

Division of Educational Statistics

OPENING FALL ENROLLMENT IN HIGHER EDUCATION, 1963

The expected surge of students has not yet hit the colleges, although the fall 1963 survey returns show continuing increases. The expectation of a sharper rise by 1965 is closely related to data on age-cohorts in the population. The number of 18-year-olds, which has been declining slightly since 1961, is approximately 3 million. Little change will take place in this age group in 1964, but a peak of approximately 4 million 18-year-olds will be reached in 1965. After 1965 the number of 18-year-olds will fall off, and again approach 4 million in 1970. Data on number of first-time students (entering freshmen) shown in this report should be interpreted in the light of the fact that in 1963 the number of 18-year-olds is still in a period of slight decline.

Historically, since its beginning in 1946, this annual survey of Opening Fall Enrollment has included counts of students taking work creditable toward a bachelor's or higher degree. Added to the survey this year is a separate item[1/] on students in occupational or general studies programs extending not more than 3 years beyond high school, which are not chiefly creditable toward a bachelor's degree; such students may or may not be in programs culminating in an associate degree. Table 1 shows the number of students in each of these two enrollment categories, by sex and by type of institutional control. Each category includes resident students and students taking their work at extension centers. The survey excludes students in adult education courses.

Data on students taking work creditable toward a bachelor's or higher degree are presented in table 2, which shows current and recent changes in enrollment, by full-time and part-time attendance status, and in enrollment of beginning freshmen (first-time students). Only those freshmen taking their first college work in the fall term are counted as first-time students; no reports are available on the number of students beginning their work in the summer or at other times during the year.

Table 3 shows fall 1963 totals for both major categories of enrollment included in the survey, by sex of students, type of institution, and institutional control. The types of institutions are listed in the first column of the table (see also section entitled "Scope of the Survey"). The 2- or 3-year institutions called "technical institutes and semiprofessional schools," added to the survey in 1963, were formerly excluded because these institutions do not offer programs consisting wholly or principally of work normally creditable toward a bachelor's degree.

The detailed data in table 4, for students taking work creditable toward a bachelor's or higher degree, show enrollment by full-time and part-time attendance status and sex of students as well as by type of institution and institutional control.

1/ See report-form reproduced at the end of this circular.

Summaries by region and State are presented in table 5. The State totals shown in table 5 are also given in the institutional listings, together with other breakdowns of State data not itemized in table 5.

In order that every enrollment item reported by each individual institution may be shown, the institutional data are presented in two separate lists rather than in a single list of the type published in previous years. The first list, table 6, summarizes for each institution the enrollment, by sex, of students in each of the two major categories and also shows the grand totals for both categories combined. All institutions in the survey are listed in table 6.

Table 7 is restricted to enrollment of students taking work creditable toward a bachelor's or higher degree. Institutional totals by sex are given for full-time and for part-time students in this category; numbers of first-time students are also shown. This list includes all institutions in the survey except the technical institutes and semiprofessional schools.

Scope of the Survey

The series of opening fall enrollment surveys is designed to provide basic data on enrollment in the early fall each year with a minimum expenditure of time. The reports therefore necessarily exclude a number of items of information of interest to educators and others.[2] These data are supplemented, however, in alternate years by other enrollment reports which include categories of students not surveyed in the early fall, and which also provide additional information about those students who are included in the early fall report--such as separate counts of resident and extension or of undergraduate and graduate students.

Registrars were asked to report the number of students as of the earliest date in the fall of 1963 when enrollment became stable. This date is usually several weeks after the beginning of the fall term. The reader should note that enrollment ascertained at this time is somewhat smaller than the enrollment for the entire fall term, and is substantially smaller than total enrollment throughout the full academic year. The differences are due to the numbers of students who enroll later in the fall term or at a later time during the academic year.

The data reported in the 1963 survey represent enrollment in institutions of higher education in the aggregate United States (i.e., the 50 States, the District of Columbia, and the outlying parts). The basic source of the mailing list for the questionnaire was the Education Directory 1962-63: Part 3, Higher Education, with such changes (additions, deletions, mergers, and separations) for the 1963-64 edition as were known to the Office of Education.

Of the 2,140 institutions, useable reports were received from all but one. Estimates based on previous data were made for this institution by the Office of Education.

For purposes of statistical analysis, institutions of higher education are classified into 10 major curricular-organizational types within two groups according to length of program. The 4-year institutions[3] offer programs reaching a level of at least 4 years beyond high school. The 2-year institu-

---

2/ For inclusions and exclusions, see instructions to the registrars on the reproduced copy of the report-form at the end of this circular.

3/ The term "4-year institutions" includes all institutions which grant bachelor's or higher degrees or some other type of recognition equivalent to such degrees (e.g., ecclesiastical recognition in a theological institution) based on at least 4 academic years of work. Both graduate and undergraduate institutions are included.

tions offer work extending at least two but less than four years beyond high school. Distributed by type, the numbers of institutions surveyed in the fall of 1963 were:

Type	Number
4-year institutions:	
Universities	146
Liberal arts colleges	788
Independently organized professional schools:	
Teachers colleges	186
Technological schools	57
Theological, religious	201
Schools of art	46
Other professional	79
2-year institutions:	
Junior colleges	577
Technical institutes	21
Semiprofessional schools	39
TOTAL	2,140

Classified as universities are institutions which give considerable stress to graduate instruction, which confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and which have at least two professional schools that are not exclusively technological. Liberal arts colleges, as differentiated from universities, are institutions in which the principal emphasis is placed on a program of general undergraduate education.

The category of "independently organized professional schools" consists of institutions which offer professional training but which are not affiliated with universities. There are five groupings of institutions within this category: (a) Teachers colleges--devoted primarily to teacher training; (b) technological schools--providing training predominantly in technical and physical science disciplines; (c) theological and religious schools--in which the program offerings are wholly or principally in theology, religion, or religious education; (d) schools of art--specializing in painting, sculpture, design, drama, music, dance, etc.; and (e) other professional schools (not classified above)--offering programs directed to one or more fields of specialization, such as medicine, law, business, pharmacy, optometry, etc.

None of the 2-year institutions grant bachelor's degrees or equivalent recognition. The junior colleges offer bachelor's degree-credit programs, creditable by transfer to 4-year institutions; some junior colleges offer terminal programs in addition, and some do not. The technical institutes (primarily engineering-related) and semiprofessional schools (not primarily engineering-related) offer programs designed to prepare for immediate employment or to provide general education not chiefly transferable to baccalaureate

programs in liberal arts or pre-professional education. Enrollment data for the technical institutes and semiprofessional schools have been combined in this report.

Accuracy of Data

Because of the possibility of over-reporting or under-reporting by individual institutions, each report-form was studied in connection with other relevant data available in the Office of Education. Data reported by each institution for item 1 and 2 on the report-form were compared for consistency with opening fall enrollment figures previously reported by the same institution. Data for item 3 were compared with corresponding items reported by institutions on the questionnaire "Comprehensive Report on Enrollment" for the first term, 1961-62. Close attention was given to any notations supplied by the respondents on the questionnaires and to previous correspondence with individual registrars in this or related surveys. Finally, the catalogs of the institutions were frequently consulted regarding the numbers and kinds of curriculums offered. When necessary, institutions were consulted concerning possible revision of their reports. These procedures almost certainly caught and corrected a high portion of the errors in reporting.

Some of the types of reporting errors discovered are enumerated below. The degree to which similar errors may remain in the data is unknown, but the procedures were designed to provide thorough checks of any data where the errors might have been large.

1. Provision of estimates where exact data were lacking. (Estimates were requested in such instances, but some of these were corrected when data became available before the close-out date.)

2. Placing of reportable students in inappropriate categories, i.e., including in item 1 students who should have been counted in item 3, and vice versa.

3. Inclusion of students in adult education programs or in other categories not covered by the survey.

4. The reporting as first-time students of the following: all freshmen; all students entering the institution (including transfers) in the fall term; or all students in attendance who had never been enrolled in any other college.

5. The reporting of first-time students by professional, religious, and other schools which require previous college work for entrance.

6. Inadvertent omission of students in certain groups such as: students on branch campuses, in extension centers, or in evening or Saturday classes; students with part-time or "special" status; and graduate students or students in professional schools.

7. Failure to include first-time students in the total for all students taking work creditable toward a bachelor's or higher degree.

For the convenience of the reader as well as for ease in statistical tabulation, enrollment totals have not been rounded, but are given as they are obtained by simple addition of the figures for individual institutions. This presentation in no way implies that totals and subtotals are accurate to the last few digits. It was believed, however, that the data could be more conveniently used if the many subtotals obtained in the analysis were reported in such a way that they would add arithmetically to the totals. Also, in view of the care with which the data were compiled by the registrars and reviewed by the Office of Education, it appeared appropriate for the totals to reflect the individual reports.

1/ Includes part-time resident students.
2/ Excludes off-campus centers. Complete figures received after close of survey.
3/ Reply to correspondence not received by November 7, 1963. Sex breakdown estimated.
4/ Extension enrollment is included in totals for "all campuses." Individual campuses do not include extension in their reports.
5/ Excludes students in extension classes.
6/ Full-time equivalent of total reported. Full-time and part-time students estimated.
7/ Sex breakdown estimated.
8/ Report not received as of the closing date; 1962 data used.
9/ Revised report received after close of survey.
10/ Excludes students taking courses under the Commission on Extension Courses.
11/ Data not available by closing date; 1962 data used.
12/ A locally-sponsored junior college under the program of the State University of New York.
13/ Includes enrollment in the College of Ceramics at Alfred, a contract college of the State University of New York.
14/ Includes enrollment in the four contract colleges of the State University of New York (College of Agriculture, College of Home Economics, School of Industrial and Labor Relations, and Veterinary College) located at Cornell.
15/ All figures are estimates. Final figures received after close of survey.
16/ Freshmen.
17/ Estimated.
18/ Day College only.
19/ Excludes evening students. Complete report received after close of survey.
20/ Excludes students in evening school and extension classes.
21/ Excludes students in off-campus evening division.

SURVEY OF OPENING FALL ENROLLMENT: 1963

Note: Please report data as soon as enrollment becomes stabilized, preferably within 2 weeks after the opening of the term.

1. In item 1 report the number of full-time and part-time students whose programs consist wholly or principally of work normally creditable toward a bachelor's or higher degree--either in your own institution, or by transfer (as from a junior college to a 4-year institution). Include "special" and "unclassified" students taking such work, regardless of their intentions concerning a degree. Students to be included may be undergraduate or graduate, resident or extension, studying during the day or evening. Include students in theological curricula even if they receive ecclesiastical recognition (such as ordination) rather than a degree. See exclusions, paragraph 4.

Count as **full-time students** those carrying at least 75% of a normal student-hour load; for graduate students this means at least 75% of the academic load in course-work or other required activity (such as a thesis) normally recommended for such students.

2. In item 2 report those students already counted in item 1 who are **first-time** students, i.e., students not previously enrolled for work creditable toward a bachelor's degree, either in your institution or in any institution of higher education. Exclude other freshmen; use estimates if exact data are unavailable.

3. In item 3 report students in 1-, 2-, or 3-year undergraduate programs designed to prepare for immediate employment or to provide general education not chiefly transferable to baccalaureate programs in liberal arts or pre-professional education. Report such students only in this item, not in item 1. Exclude adult education enrollments.

4. DO NOT INCLUDE IN THIS REPORT: (a) students in *adult education courses;* (b) students taking courses at home by *mail, radio, or TV;* (c) students enrolled for *individual lessons only* (as in art, music, speech, etc.); (d) students enrolled only for "*short courses*"; (e) *auditors;* (f) students at any branch campus or extension center in a *foreign country.*

5. If exact data are lacking for a group that should be included (e.g., extension students taking bachelor's degree-credit work), include an estimate for the group. If you cannot do this, note the omission in the upper right corner of the report-form.

6. Check to make sure that individual entries add to totals. Also, please verify that the numbers shown in item 2 for first-time students are less than those shown in item 1c. The reverse side of this card is for your files.

7. Please complete the form below, and detach and mail it as promptly as possible. No postage is required.

DEPARTMENT OF HEALTH, EDUCATION, & WELFARE — OFFICE OF EDUCATION

SURVEY OF OPENING FALL ENROLLMENT: 1963

RESIDENT AND EXTENSION STUDENTS	MEN	WOMEN	TOTAL
1. Students taking work normally creditable toward a bachelor's or higher degree: a. Full-time			
b. Part-time			
c. TOTAL (a + b)			
2. **First-time** students, included in item 1 above (beginning freshmen with no prior credits applicable toward a bachelor's degree)			
3. Students in occupational or general studies programs not chiefly creditable toward a bachelor's degree			

Name any student groups which you could not include in items 1 and 2 (see instruction 5):

Please compare items 1 and 2 with the data you reported last fall. Note below the reasons for any large increases or decreases:
